EDUCATION

Vivekananda Institute Of Technology

Bachelor Of Technology, Major CSE

Jaipur, Rajasthan

Oct. 2022– Present

Senior Secondary

Science-Mathematics

Indragarh , Bundi, Rajasthan

June , 2021

EXPERIENCE

Software Engineer Intern

March. 2026 – Present

IQuint Technology Services

- Building a full-stack Hospital Management System for small and village area hospitals with the Bed Capacity(10-150) for managing patients, appointments, OPD/IPD workflows, billing, and reports.
- Developing a billing and payment module with invoice generation, discounts, receipts, audit trail, and collection reports.
- Implemented role-based access control for admins, doctors, receptionists, nurses, and billing staff with protected navigation.
- Integrated real-time, API-driven dashboards and analytics to replace hardcoded statistics across modules.
- Created a responsive React + TypeScript frontend with Django backend services for a complete hospital workflow solution.

Next.js Developer(Part-Time)

Sept. 2025 – Oct. 2025

computatia.in

VGU, Jaipur

- Re-architected legacy UI into modular, reusable Next.js components, improving maintainability and rendering performance.
- Engineered responsive, mobile-first interfaces using Tailwind CSS and custom CSS, ensuring consistent UX across devices.
- Designed and implemented adaptive layouts for unconventional screen sizes (e.g., Google Nest Hub 1024×600).
- Improved rendering efficiency by restructuring component hierarchy and minimizing unnecessary re-renders.
- Took end-to-end ownership of UI feature delivery, from requirement understanding to production deployment.

PROJECTS

FinDash - Full-Stack Personal Finance Dashboard : [Github](#)

July 2024 - Present

- **Architected and developed a complete RESTful API** using **Node.js** and **Express.js**, connecting to a **MySQL** database to handle all backend logic for user data, transactions, and savings goals.
- **Engineered a secure authentication system from the ground up**, implementing password hashing with **bcrypt** and session management using **JSON Web Tokens (JWT)** to protect all sensitive user endpoints.
- **Implemented SQL transactions** for critical operations, such as adding a new expense, to ensure data integrity by atomically updating both the **Transactions** and **Accounts** tables.
- **Built a dynamic and responsive multi-page frontend** with vanilla **JavaScript**, **HTML**, and **Tailwind CSS**, featuring interactive components like a live data chart, modals for data entry, and persistent user preferences.
- **Developed full CRUD (Create, Read, Update, Delete) functionality** for all core features, including transactions, savings goals, and user-managed credit cards.
- Handled UI edge cases including empty states, error handling, and loading indicators to ensure a resilient user experience. .
- **Technologies:** Node.js, Express.js, JWT, bcrypt, MySQL

E-commerce Backend (Django/DRF) : [Github](#)

Nov. 2025 - Present

- Built a Django 6 + DRF e-commerce API (products, collections, carts, orders, reviews) with JWT auth (Djoser + SimpleJWT) and custom user model (unique email).
- Designed relational schema (products, collections, customers, orders, order items, carts) on MySQL; enforced data integrity with FK protections and unique constraints; used signals to auto-create customer profiles on user registration.

- Implemented catalog filters/search/sort/pagination with django-filter and DRF pagination; optimized endpoints via select_related/prefetch_related to avoid N+1 queries.
- Secured admin/staff vs authenticated user permissions; restricted destructive operations on referenced products/collections.
- **Technologies:** Django 6, DRF, Djoser + SimpleJWT, django-filter, MySQL

CERTIFICATES

Explore a Career in Front-End Web Development	July 2025
JavaScript Essential Training	July 2025
Explore Web Development With Node.js	Aug. 2025

TECHNICAL SKILLS

Frontend : Next.js, React, JavaScript (ES6+),Typescript, Tailwind CSS, HTML5, CSS3
Backend : Node.js, Express.js, Django, REST APIs
Databases: MySQL, PostgreSQL
Developer Tools: Git, VS Code, Figma
Libraries: Tailwind CSS
